CUSTOMISED FOOD TRUCK, TRAILER, CART & COMMERCIAL KITCHEN EQUIPMENT

# CNC Hydraulic Press Brake – High-Precision Sheet Metal Bending Facility

Our manufacturing unit is equipped with an advanced CNC Hydraulic Press Brake, enabling us to produce highly accurate and perfectly finished sheet-metal components for food trucks and commercial kitchen equipment. This machine allows us to bend stainless steel, mild steel, and aluminum sheets with exact angles and uniformity, ensuring strong structures, superior fitment, and a premium appearance.

## Applications in Our Manufacturing

This CNC press brake is used to fabricate:

- Kitchen Equipment.
- Food truck body panels.
- Kitchen cabinets and shutters.
- Counters and workstations.
- Exhaust hoods.
- Storage racks and partitions.
- Wall and floor panels.
- Custom metal components.

**Each part is bent with high precision, perfect angles, and tight fitting, resulting in a strong, vibration-free structure.**

## Why CNC Bending Matters

CNC bending ensures:

- High accuracy and repeatability
- Clean and sharp edges
- Strong and durable joints
- Better surface finish
- Long-lasting product quality

***This means our clients receive better durability, superior fit, and a professional-grade finish.***

# CNC Fiber Laser Cutting System –

**Advanced Metal Processing Technology**  
To achieve world-class accuracy and superior finishing, our facility is powered by the **CNC Fiber Laser Cutting System**.

This advanced machine enables us to process metal sheets with **micron-level precision**, ensuring every component is produced exactly as designed. Using high-speed fiber laser technology, we cut **stainless steel, mild steel, and aluminium** with **perfect geometry, smooth edges, and zero deformation** — ideal for high-quality food truck and commercial kitchen fabrication.

## Why This Matters to Our Clients

Laser-cut components ensure:

- Stronger structural assembly
- Better finishing
- Faster fabrication
- Longer product life
- A premium professional look

## Our Edge

*"By integrating CNC fiber laser technology into our production, we deliver food trucks and commercial kitchens with unmatched precision and factory-grade quality."*

## Key Capabilities

- Large working area
- High-speed fiber laser cutting
- Suitable for SS, MS & Aluminums
- Clean, burr-free edges
- Excellent dimensional accuracy

# Food truck & equipment

"We specialise in crafting customised food trucks, combining innovative design with high-quality craftsmanship to meet our clients' unique needs and exceed industry standards."

mv equipment Food Trucks are crafted using the chassis of commercial vehicles from renowned brands like Bajaj, Tata, and Eicher. Our portable food kitchens are fully customizable, designed to fit any desired size or shape according to client specifications. We offer a comprehensive turnkey solution with our in-house team of expert designers who create striking exterior designs and graphics to captivate the public. Inside, we deliver high-tech, modern, clean, and ergonomic kitchen spaces. Our team of hospitality professionals, who have gathered inspiration from top food trucks in cities like San Francisco, Paris, Bangkok, and Adelaide, ensures that the kitchen interiors adhere to the highest international standards.
